## EnduroCo™ UNIT BEARINGS

### KEEPING YOUR TRUCK ON TRACK.

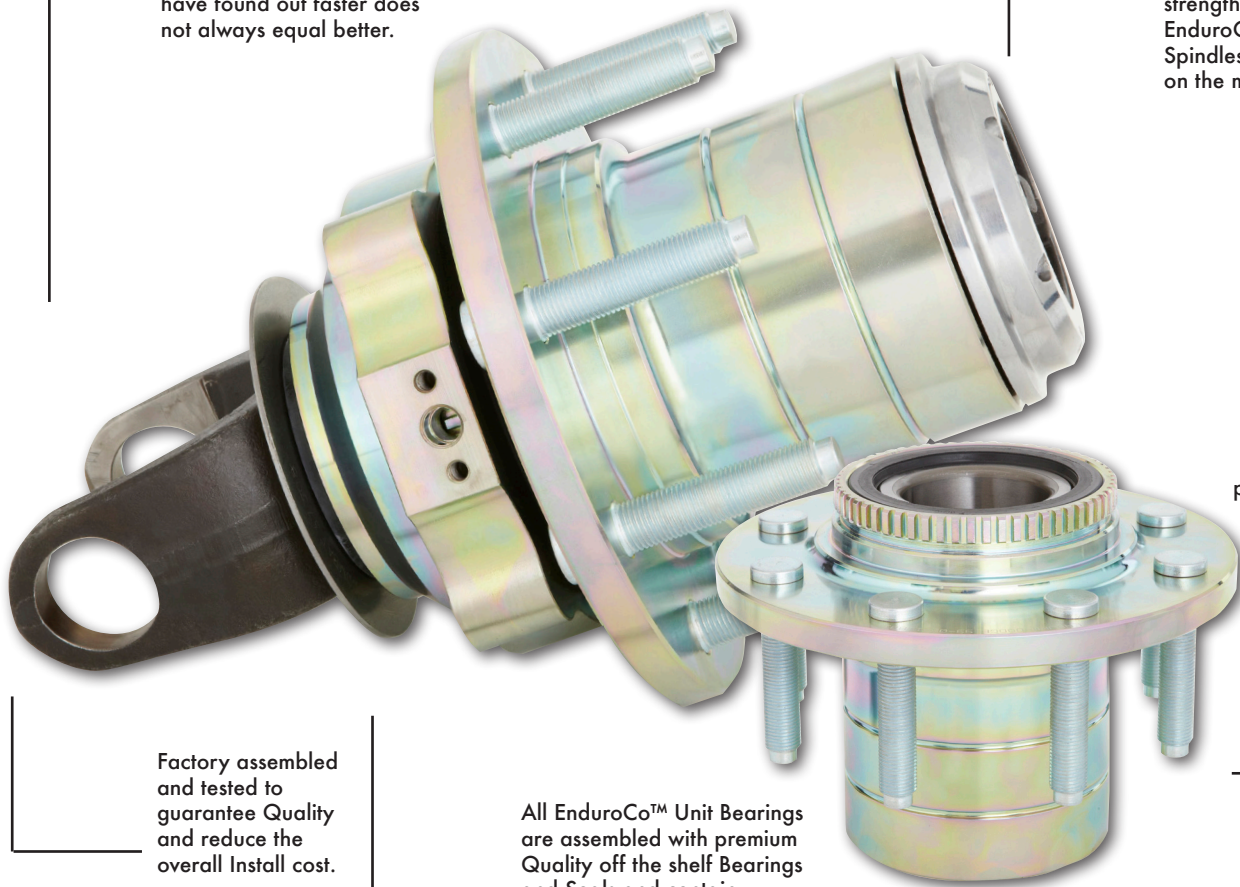

Whether you rely on your vehicle for work or leisure, you cannot afford to be sitting still due to an unfortunate Unit bearing failure. OEM Unit Bearings are designed to make the assembly easy and cheap saving the OEM time and time IS money. But as most have found out faster does not always equal better.

EnduroCo™ have designed a New innovative Shorter Unit Bearing with No wheel Overhang. The new EnduroCo™ hub incorporates an innovative fully sealed ABS system which utilises the existing OEM Sensor. This innovative sealing system will withstand the toughest environment.

EnduroCo™ Unit Bearings are made from Steel Forgings not castings. Forged material compacts the molecular structure giving a uniform longitudinal grain flow that increases the Tensile strength. This makes the EnduroCo™ Hubs and Spindles the most superior on the market today.

EnduroCo™ Unit Bearing replacements are manufactured using world's best practice, state of the Art Manufacturing and technology systems. These systems incorporate Multi Axis C.N.C controlled machining processes giving you a guarantee of Quality and Finish.

Factory assembled and tested to guarantee Quality and reduce the overall Install cost.

All EnduroCo™ Unit Bearings are assembled with premium Quality off the shelf Bearings and Seals and contain Induction hardened 35 spline 4340 Axle Shafts and Manual Locking Hubs for improved Fuel Economy and reduced Tyre wear.

EnduroCo™ Unit Bearing have a high Performance Three stage Mil Spec Trivalent plating process making them the most corrosion resistant Hub and Spindle on the market.

#### Available to suit the following Models:

Dodge Single Wheel 2000-2013  
Dodge Dual Wheel 2000-2013  
Ford Single Wheel 1999-2008
